Books

- Friedman, Sue et al. **Confronting Hereditary Breast and Ovarian Cancer: Identify Your Risk, Understand Your Options, Change Your Destiny**. Baltimore, MD: Johns Hopkins University Press, 2012.

- Hesse-Biber, Sharlene. **Waiting for Cancer to Come: Women's Experiences with Genetic Testing and Medical Decision Making for Breast and Ovarian Cancer.** Ann Arbor, MI: University of Michigan Press, 2014.
- Morris, Joi L. and Gordon, Ora K. **Positive Results: Making the Best Decisions When You're at High Risk for Breast or Ovarian Cancer.** Amherst, NY: Prometheus Books, 2010.

Audiovisual Resources

- **FORCE. Facing Our Risk of Cancer Empowerment**
FORCE YouTube Channel includes many videos on hereditary breast and ovarian cancers. Access at:
<http://youtube.com/user/facingourrisk>

Web Resources

- **Breast Cancer Genetics Network of Michigan**
<http://mi-cancergenetics.org>
Information on the genetics of breast and ovarian cancer, and the experiences of visiting a cancer genetics clinic in the State of Michigan.
- **BreastCancer.org - section on Genetics**
<http://breastcancer.org/risk/factors/genetics>
- **FORCE. Facing Our Risk of Cancer Empowerment**
<http://facingourrisk.org>
The information on this site helps women understand risk, genetic testing, and legal and ethical issues facing women with a confirmed BRCA mutation. Preventative measures that may reduce risk are discussed in detail, including prophylactic mastectomy, surgical menopause, chemoprevention, and more.
- **Genetics, Causes, Risk Factors, Prevention section on Cancer.gov**
<http://cancer.gov>
 - Click the link to "*Prevention, Genetics, Causes*" under "*Cancer Topics*"
This site links to documents on cancer genetics, genetics of breast and ovarian cancer, and the Cancer Genetics Services Directory; a directory of professionals who provide services related to cancer genetic risk assessment, counseling, and testing.
- **Genetics Home Reference**
<http://ghr.nlm.nih.gov>
This site includes condition summaries that describe the genetic causes and pattern of inheritance for specific cancer types and a handbook that provides illustrated, basic explanations of how genetic mutations cause disorders.
